3. Classic milk frother (mod. Velasca Black).
4. Ground coffee option
5. 10-settings adjustable grinder.

2.

3.

5.

# HIGHLIGHTS & FEATURES

## 100% CERAMIC GRINDERS

The robust 100% ceramic grinders guarantee a moment of pure coffee indulgence for years to come. The ceramic material creates the ideal grind, which allows the water to flow through steadily, extracting the purest essence of the beans. And unlike other 'regular' grinders', the ceramic material prevents the coffee from overheating and tasting burnt.

## QUICK HEAT BOILER

When time is of the essence, you can brew perfect espresso and cappuccino without the wait, thanks to the Quick Heat Boiler. The secret is in its light aluminum and stainless steel body, which can reach hot temperatures, fast.

## AQUACLEAN FILTER

Saeco's new and patented innovation, AquaClean water filter, ensures you make the most out of your full automatic coffee machine. By changing the filter at machine request, you will not need to descale your machine for up to 5000 cups\*, while getting the benefit of clear and purified water. As an added benefit, the descaling notification alarm is automatically deactivated once AquaClean is installed in your favourite Saeco coffee machine.

## COFFEE AT ONE TOUCH

From Espresso to Cappuccino, there is an assortment of options waiting to satisfy your coffee cravings. Whether it's first thing in the morning or an after dinner treat, there's a taste for any time of the day, right at your fingertips.

## ONE-TOUCH CAPPUCCINO AND MORE

Every coffee you prepare will be topped with a silky, milk layer that beckons the taste buds. The milk carafe froths the milk twice, then pours a splash free creamy layer into your cup at just the right temperature. The carafe can also be stored conveniently in the fridge, it's dishwasher proof, and incredibly hygienic.

## 10-SETTINGS ADJUSTABLE GRINDER

When it comes to the fineness of the grind, this machine never fails to satisfy. Different coffee blends require different levels of granularity for the full flavour to unfold. So the grind granularity of this machine has ten adjustable settings – from the finest grind for a full bodied espresso, to the coarsest for a lighter coffee.

## POWDER OPTION

Sometimes it's nice to have the option of a full-bodied delicious coffee, without the caffeine kick. Thanks to the Powder Option you can make decaffeinated coffee whenever you please.

## CUSTOMIZE YOUR COFFEE

Choose your ideal strength from the 5 different settings, select the length and the temperature. You can easily save your desired coffee length with the Memo Function for each drink. Then every cup in the future will be customised exactly to your taste. You'll never have to remind it again, unlike the local barista.
